STUDENT ACCEPTABLE USE OF THE CPS NETWORK

Authorized student use of information resources must be consistent with the educational purposes for which these resources have been provided. Use of the CPS Network is a privilege that is provided to help student authorized users complete and deliver educational obligations. The CPS Network provides student authorized users with the means for communicating effectively with schools, teachers, administrators, the public, other government entities, and educational experts. These resources should be used in a manner that both enhances students' educational experiences and complies with this policy and regulations established from time to time by the Chicago Board of Education ("Board").
